## 1. Use-case Model

### • List of Actors

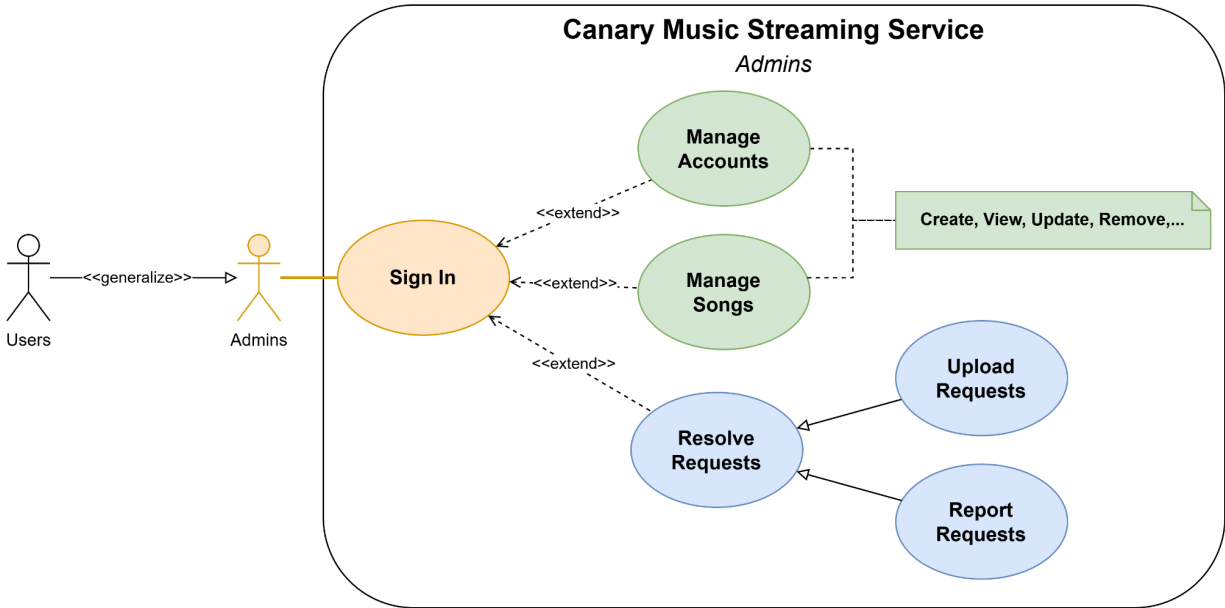

No.	Actors	Descriptions
1	Guests	Are users that have not signed in to the website. They can sign up, find songs, and listen to them but cannot star them or add them to playlists.
2	Members	Are the users who have signed in to the service inheriting all the functionalities of the guest users. Furthermore, they now can star songs, create playlists, and even upload songs to the community.
3	Admins	They will manage the issues relating to song reports and upload pending requests. They also have access to the songs and accounts database.
